

Standard Operating Procedure (SOP) - OPS-007

Stock Ordering & Inventory Management

Purpose

To ensure the clinic maintains appropriate stock levels at all times, preventing shortages while minimising waste. This procedure covers the monitoring, ordering, receiving and storage of both clinical and non-clinical supplies required for the safe and efficient running of the clinic.

Responsibility

This procedure should be followed by all Receptionists, Administrators and authorised members of staff responsible for stock management. Clinical practitioners are responsible for notifying the administration team of any additional clinical stock requirements.

General Principles

The clinic should maintain sufficient stock to support day-to-day operations without excessive over-ordering.

Stock levels should be:

- Monitored regularly.
- Replenished before supplies become low.
- Stored appropriately.
- Rotated where applicable to minimise waste.
- Checked for expiry dates where relevant.

Stock Categories

The clinic maintains stock across the following categories:

Clinical Stock

Including:

- Injectable products
- Needles and cannulas
- Syringes
- Gloves
- Gauze
- Sharps bins
- Clinical wipes
- Skin preparation products

Clinical stock should be stored in accordance with manufacturer guidance and any temperature requirements.

Reception & Refreshments

Including:

- Tea
- Coffee
- Sugar and sweeteners
- Milk (where applicable)
- Water cooler supplies

Washroom Supplies

Including:

- Toilet roll
- Hand soap
- Hand towels
- Toilet cleaning products
- Air fresheners

Cleaning Supplies

Including:

- Surface disinfectants
- Multi-purpose cleaner
- Bin liners
- Cloths
- Paper towels
- Disposable cleaning gloves

Kitchen Supplies

Including:

- Mugs
- Glasses
- Cups
- Spoons

Replace any damaged or chipped items promptly.

Reception Presentation

Including:

- Candles
- Fresh flowers
- Decorative items as required

Ensure flowers remain fresh and replace as necessary to maintain a welcoming environment.

Marketing Materials

Including:

- Leaflets
- Treatment brochures
- Business cards
- Appointment cards
- QR code cards
- Other printed promotional materials

Monitor stock levels to ensure marketing materials remain available for clients.

Stock Monitoring

Stock levels should be checked routinely.

Pay particular attention to:

- Frequently used clinical consumables.
- Reception refreshments.
- Toilet and cleaning supplies.
- Marketing materials.
- Seasonal or promotional items.

Storage

All stock should be:

- Stored cleanly and securely.
- Easily accessible.
- Protected from damage.
- Stored according to manufacturer guidance.

Clinical products requiring temperature-controlled storage must be stored appropriately and monitored where required.

Quality Assurance

To ensure efficient stock management:

- Carry out regular stock checks.
- Maintain minimum stock levels for essential items.
- Report recurring shortages to the Clinic Manager.
- Review stock usage periodically to identify trends and reduce waste.
- Ensure all storage areas remain clean, organised and well maintained.
