

Standard Operating Procedure (SOP) - OPS-008

Building Maintenance

Purpose

To ensure the clinic premises are maintained to a high standard, providing a safe, clean and welcoming environment for clients, visitors and staff. This procedure outlines the routine monitoring, reporting and coordination of building maintenance to minimise disruption and ensure compliance with health and safety requirements.

Responsibility

This procedure should be followed by all members of staff. The Reception & Administration team are responsible for identifying and reporting maintenance issues, while the Clinic Manager is responsible for arranging repairs and liaising with contractors where required.

General Principles

The clinic should be maintained to a consistently high standard at all times. Staff should:

- Take pride in the appearance of the premises.
- Report maintenance issues promptly.
- Help prevent avoidable damage where possible.
- Ensure client safety remains the highest priority.

Any issue presenting an immediate risk to health and safety should be reported to the Clinic Manager immediately and appropriate action taken to make the area safe.

Daily Visual Checks

As part of the opening and closing procedures, carry out a visual inspection of the premises, including:

- Reception and waiting areas.
- Treatment rooms.
- Toilets.
- Kitchen and staff areas.
- Corridors and communal spaces.
- Entrances and exits.

Check for:

- Damage.
- Cleanliness.
- Trip hazards.
- Water leaks.
- Broken fixtures or fittings.
- Faulty lighting.
- General wear and tear.

Routine Building Maintenance

Monitor the condition of:

- Internal and external lighting.
- Heating and ventilation.
- Windows and doors.
- Locks and keys.
- Plumbing and taps.
- Toilets and washroom facilities.
- Electrical sockets and switches.
- Flooring, carpets and rugs.
- Furniture.
- Signage.
- Decoration and paintwork.

Report any defects promptly.

External Areas

Where applicable, regularly inspect:

- Entrance pathways.
- Car park and access routes.
- Outdoor lighting.
- External signage.
- Landscaping and planted areas.
- Waste storage areas.

Ensure entrances remain clean, safe and accessible for clients.

Reporting Maintenance Issues

Any maintenance issue should be reported as soon as it is identified.

Record:

- The nature of the issue.
- Its location.
- The date it was identified.
- Any temporary action taken.
- Whether the issue requires urgent attention.

The Clinic Manager should be informed of all significant maintenance issues.

Contractors

Where repairs are required:

- Only approved contractors should carry out maintenance work.
- Contractors should sign in where appropriate.
- Work should be scheduled to minimise disruption to clients whenever possible.
- Staff should ensure contractors work safely within the clinic environment.

Health & Safety

Staff should immediately report:

- Water leaks.
- Electrical faults.

- Broken locks.
- Fire safety concerns.
- Damaged flooring creating trip hazards.
- Structural damage.
- Broken glass.
- Pest activity.
- Any issue that could place clients or staff at risk.

Where necessary, isolate the affected area until it has been made safe.

Planned Maintenance

Routine servicing should be arranged for equipment and building systems where required, including:

- Heating and air conditioning.
- Fire alarm systems.
- Emergency lighting.
- Fire extinguishers.
- Electrical inspections.
- Plumbing systems.

Maintain records of servicing, inspections and repairs.

Documentation

Maintain records of:

- Reported maintenance issues.
- Repairs completed.
- Contractor visits.
- Servicing schedules.
- Safety inspections.
- Any temporary measures implemented.

Quality Assurance

To maintain a safe and professional clinic environment:

- Carry out regular inspections of the premises.
- Report maintenance concerns promptly.
- Complete repairs as soon as reasonably practicable.
- Keep maintenance records up to date.
- Review recurring issues to identify opportunities for preventative maintenance and continuous improvement.
